HISTORY

Since 1988, our Adornos team, has continued improving performance adapting to the rapid market changes, upgrading our equipment and techniques and applying state-of-the-art pioneering technologies. Our aim is to materialize every idea in the minimum time, printing and transforming both rigid and flexible materials.

Our distinctive feature is the absolute control of the production process. We create, design, fabricate, print, assemble, pack and ship our top standard products reducing the lead times.

The company comprises a team of 26 professionals and its global organization chart covers several functional areas: Management, Marketing and Sales, Technical Office, Administration and Production.

We follow a simple business philosophy focusing on innovation and constantly improving the quality of our products by in-house production and on expanding our share in the European market.

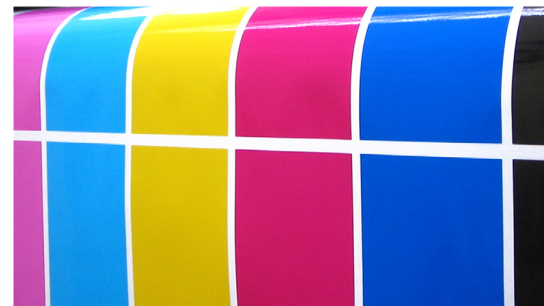

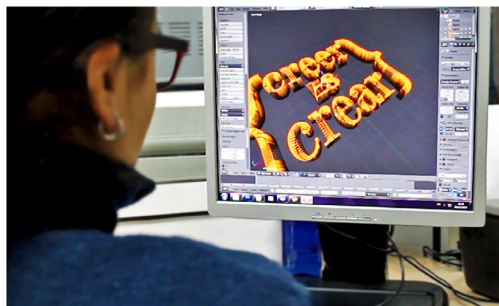

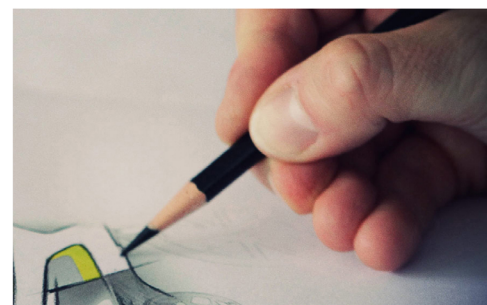

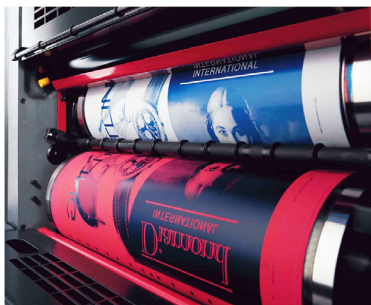

SERVICES

Our Technical Office boasts creative staff that designs the most original and unique products. We develop the ideas articulated and delivered by our clients or suggest our own solutions, developing our concepts in line with market demand.

As every item can be made to individual order, we can provide products to suit the direct marketing target for any event, trade fair or street marketing activity, supplying unique items that may transform the event into an unforgettable experience.

Even though we are highly specialized in POS advertising of products and merchandising, we also provide complementary services related to Art and Decoration. We provide products for recognized professionals in window dressing, visual merchandising, we work for commercial interior contractors, art exhibitions and interior designers.

Advertising at point of sale adds value to the brand image. It is vital for the communication of the company with its clients, irrespective of the nature of the conducted business. In Adornos we specialize in POS advertising products, promotional items and professional decoration. We offer the following services:

1. PRINTING:

Both on rigid and flexible materials, including large scale printing. Our machines allow for printing on a wide range of flat supports up to 5cm thick. Print in up to 1200dpi resolution (high resolution print):

- DIGITAL.
- SILKSCREEN:
 - Automatic silkscreen tunnel.
 - Pad printing and heat transfer. Print on any object irrespective of its structure or surface.

2. CUTTING AND TRIMMING:

Different techniques:

- LASER: for cutting and engraving. Allows for complex cutting patterns.
- ROUTING MACHINE: Allows for 3D carving for high quality and unique items in different kinds of materials.
- SAWS.
- BLADE CUTTING.

3. HEAT-FOLDING AND MANIPULATION:

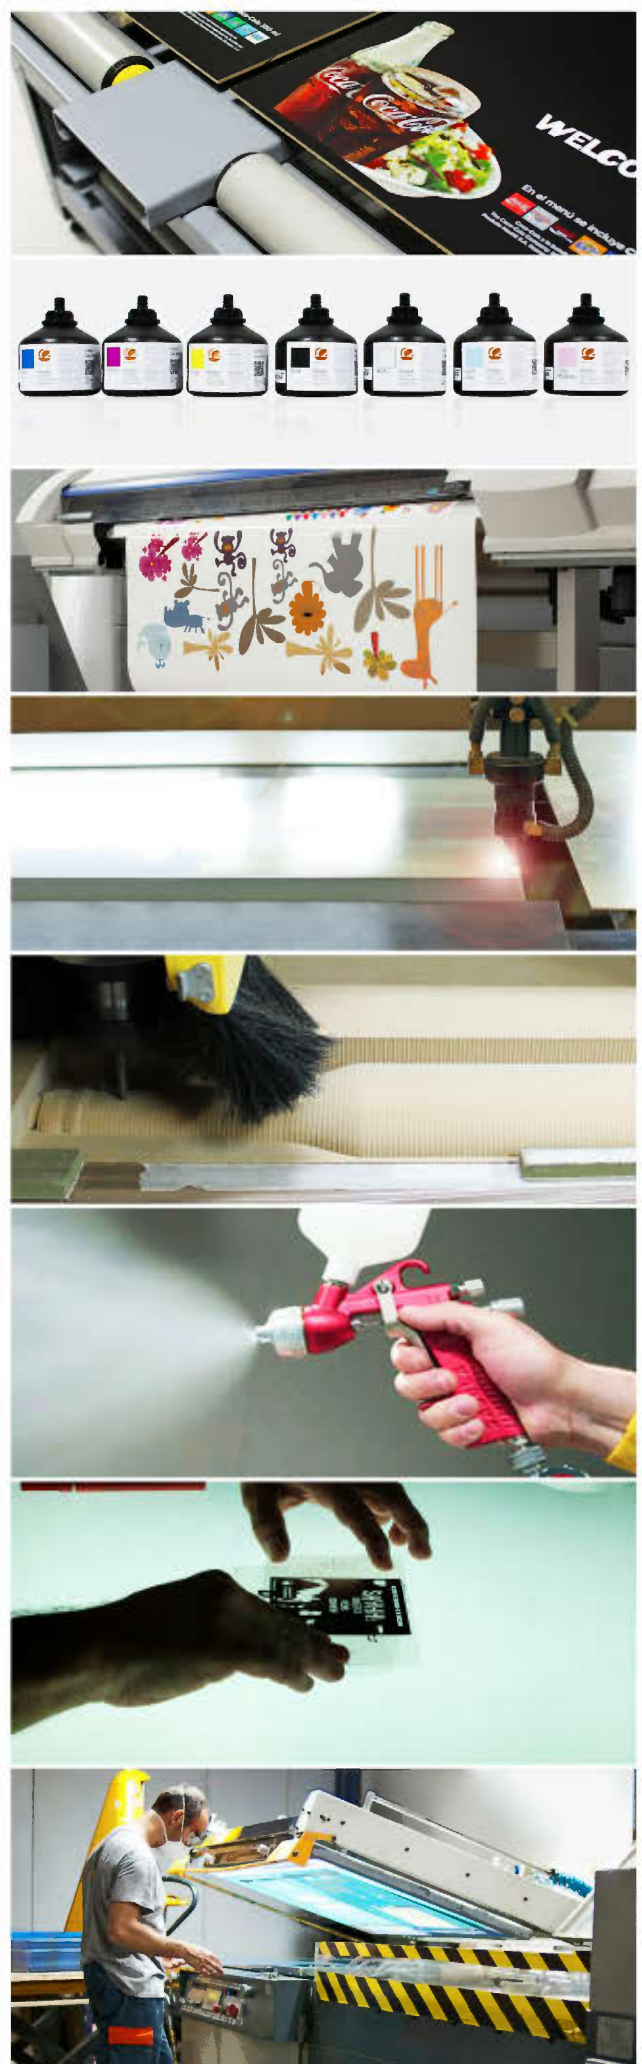

Folding plastics through heat application. Manipulation of materials to give them the desired form and shape, preparation for their final presentation and shipping.

4. CARPENTRY

5. PAINTING

6. CUTTING TO SHAPE

7. 3D PROTOTYPING

8. THERMOFORMING WITH DIGITAL PRINT:

We pioneer in this technique by the use of inks destined to thermoforming. That is one of the top technologies within prototyping and promotional materials' industry. Our machines allow for both short and long productions and achieve 3D effect at a very competitive cost. The volume will give life to your designs. You can create objects in real size or even bigger, that will strongly impact the final consumer.

All our products are created and fabricated entirely in Adornos. Different kinds of materials can be applied.
